Bahrul Rozak

Front End Engineer | Mentor | Technical Writter
Kota Tangerang, Banten, Indonesia

Ringkasan

Assalamualaikum! Merhaba!
As an experienced Web Developer from Indonesia, I have the
ability to build websites using cutting-edge technologies such
as the CodeIgniter, Laravel, and Vue.js frameworks. I have both
individual and team working experience, allowing me to efficiently
and effectively complete tasks and projects. My current focus is
on improving my skills as a Front End Developer by learning new
technologies and participating in open source projects. Additionally,
I have a hobby of sharing my knowledge of programming through
Github. I am confident that my skills and experience, along with my
passion for sharing knowledge, will be highly valuable in helping a
company or team achieve their goals.

Regards
Bahrul Rozak - Student from University of Muhammadiyah Prof. DR.
HAMKA
